GREAT GERMAN OFFENSIVE LAUNCHED ON WEST FRONT

BRITISH LINES FORCED BACK TO POSITIONS HELD TWO YEARS AGO

Germans Claim 40,000 Prisoners And 950 Guns

Germans Are Shelling Paris With A Seventy-five Mile Range Gun

The German offensive, which has been raging for 7 days, is now being checked. The towns of Roye, Albert, Peronne, Nestle Bapaume and Ham were taken by the Germans, who drove the British back, at one point, a distance of 25 miles.

The German losses are placed at 400,000, during the past week of the offensive. Latest reports say the Germans are now attacking east of Arras. The Allies still keep their line intact.

There will be a dance in the Big Hall on Friday night, April 5th.

Mr. and Mrs. A. J. Penny returned home on Wednesday.

A large crowd is looked for, on Monday night, when the local talent stage their play, "Facing the Music." The members have been working faithfully on their parts during the past weeks, and will no doubt give a creditable portrayal of this comedy. The advance sale of tickets has been very good.

At the General Meeting of the Sounding Lake U. F. A. held Mar. 23, it was decided that the Membership closes on the last day of March, anyone wishing to join after that date may do so at the discretion of the directors. The next meeting will be held on Saturday, April 20th, at 8 p. m. sharp, when order will be taken for lumber.

W. Atkin, Sec-Treas.

FOR TRADE

Will trade a good 5 year old work horse for a driver. Apply to H. Matthews, 2 1/2 miles N. E. of town. Sec. 16-35-4

Mr. FARMER!

The DUTY has been taken off our TITAN TRACTOR, so now the cost of our 10-20 TRACTOR is not as much as six good horses are worth. And one man can do twice as much work with the TRACTOR as he can with horses.

Horses, and oats to feed them, are high and scarce. Farm labor is a very uncertain question. Let our 10-20 Titan Tractor answer this question for you. It has proved ITS RELIABILITY. BUY NOW!

The Ford Saves the Hay and Oats the Horses Eat

IT HAS been estimated that five acres of land are required to maintain one horse for a year, and that the same five acres would produce, nearly enough food for two people. If 50,000 Canadian farmers each replaced one horse with a Ford, 250,000 acres would be added to the Nation's source of food supply and enough extra food made available to feed 100,000 people.

Just think what a great service this means to the country at the present time and the benefit to the farmers from the sale of food produced on this acreage.

A Ford car also saves the farmer a week or more of valuable time each year, which can be used for further productive work. The Ford travels three times as fast as a horse and rig—costs less to run and keep, and is far easier to take care of. With labor so scarce and high priced, time means money, so do not delay in getting your Ford.

Note and Comment

Now is the time to get busy, before the new school is built, if it is intended to do anything in the way of Consolidation for Monitor and surrounding district. We understand that a meeting is being arranged for, when several prominent people will speak. A Consolidated School is the only solution of the educational problem, in the rural parts of any country, and there should be no hesitation in having a consolidated district at this point.

A great deal of unnecessary growling, heart-ache, head-ache, back-ache, and many skinned knuckles in this old world could be saved if legislation could be passed forbidding the renovating of a house more than once a year. At house-cleaning time which comes around all the way from twice to five times a year according to the family code, a man wants to commit suicide and his wife wants to kill him because he does not. It is a necessary evil that breaks backs and hearts at the same time. It is something man raises a row about doing and a bigger one about not doing. It is contradictory; it is redolent of soap-suds, cobwebs and carpet-beating, heads in dust rags and with bare arms; it is a nuisance and none dare dispute the assertion!

These are days when old methods are passing away, and the latest thing is the selecting of farms by settlers on the basis of soil analysis. According to the Dept of Colonization of the C. P. R. such an instance recently came to their notice. Soil from Western Canada was submitted to Prof. Sievers, soil physicist of the State College of Washington, at Pullman, Wash. Prof. Sievers' report on this soil should no doubt further encourage settlement in Western Canada. It reads as follows:

"We have analysed this sample and find that it runs fairly high in lime, very high in potash, phosphorus and in nitrogen; that it has a splendid supply of organic matter and is in the best physical condition. There is nothing wrong with this soil from the standpoint of crop production, and I am satisfied that it will give splendid results wherever put under cultivation."

The Food Controller says:

The Allied larder is dangerously empty but we are carrying on in the resolute belief that we can rely on the people of North America to prevent our food supplies from becoming so diminished as to imperil the issue for which we are all fighting.

The Canada Food Board is preparing plans for the mobilization of labor for spring seeding operations. Men familiar with handling horses will be specially needed and it is essential that they be secured to work on the land.

Waste and want are twin sisters and neither is beautiful.

Every little bit makes a muckle.

False Impression Of R. F.
C. Rules Is Corrected

Lieut. MacNammara, the officer in charge of recruiting for the Royal Flying Corps in this district, has written, asking us to correct the false impressions held by many men who come under the Military Service Act, that they must wait until they have been drafted into a Depot Battalion before they can make application to join the Royal Flying Corps.

On the contrary a man who is liable to draft should make application at once, in order that the necessary steps may be taken for his immediate enlistment into the Royal Flying Corps.

The Ford Saves the Hay and Oats
the Horses Eat

IT HAS been estimated that five acres of land are required to maintain one horse for a year, and that the same five acres would produce nearly enough food for two people. If 50,000 Canadian farmers each replaced one horse with a Ford, 250,000 acres would be added to the Nation's source of food supply and enough extra food made available to feed 100,000 people.

Just think what a great service this means to the country at the present time and the benefit to the farmers from the sale of food produced on this acreage.

A Ford car also saves the farmer a week or more of valuable time each year, which can be used for further productive work. The Ford travels three times as fast as a horse and rig—costs less to run and keep, and is far easier to take care of. With labor so scarce and high priced, time means money, so do not delay in getting your Ford.

Note and Comment

Now is the time to get busy, before the new school is built, if it is intended to do anything in the way of Consolidation for Monitor and surrounding district. We understand that a meeting is being arranged for, when several prominent people will speak. A Consolidated School is the only solution of the educational problem, in the rural parts of any country, and there should be no hesitation in having a consolidated district at this point.

A great deal of unnecessary growing, heart-ache, head-ache, back-ache, and many skinned knuckles in this old world could be saved if legislation could be passed forbidding the renovating of a house more than once a year. At house-cleaning time which comes around all the way from twice to five times a year according to the family code, a man wants to commit suicide and his wife wants to kill him because he does not. It is a necessary evil that breaks backs and hearts at the same time. It is something man raises a row about doing and a bigger one about not doing. It is contradictory; it is rotolent of soap-suds, cobwebs and carpet-beating, hands in dust rags and with bare arms; it is a nuisance and none dare dispute the assertion!

These are days when old methods are passing away, and the latest thing is the selecting of farms by settlers on the basis of soil analysis. According to the Dept of Colonization of the C. P. R. such an instance recently came to their notice. Soil from Western Canada was submitted to Prof. Sievers, soil physicist of the State College of Washington, at Pullman, Wash. Prof. Sievers' report on this soil should no doubt further encourage settlement in Western Canada. It reads as follows:

"We have analysed this sample and find that it runs fairly high in lime, very high in potash, phosphorus and in nitrogen; that it has a splendid supply of organic matter and is in the best physical condition. There is nothing wrong with this soil from the standpoint of crop production, and I am satisfied that it will give splendid results wherever put under cultivation."

The Food Controller says:

The Alliedarder is dangerously empty but we are carrying on in the resolute belief that we can rely on the people of North America to prevent our food supplies from becoming so diminished as to imperil the issue for which we are all fighting.

The Canada Food Board is preparing plans for the mobilization of labor for spring seeding operations. Men familiar with handling horses will be specially needed and it is essential that they be secured to work on the land.

Waste and want are twin sisters and neither is beautiful.

Every little bit makes a muckle.

False Impression Of R. F. C. Rules Is Corrected

Lieut. MacNamara, the officer in charge of recruiting for the Royal Flying Corps in this district, has written, asking us to correct the false impressions held by many men who come under the Military Service Act, that they must wait until they have been drafted into a Depot Battalion before they can make application to join the Royal Flying Corps.

On the contrary a man who is liable to draft should make application at once, in order that the necessary steps may be taken for his immediate enlistment into the Royal Flying Corps.

Further information may be obtained from A. O. Thomas of Corporation.
